EARTH'S TRUEST HAPPINESS

IS AT HOME. And what is health and what is wealth,
The lonely allen cries,
Without a rest for head and breast
Where all our treasure lies?
Can he who, wandering o'er the earth,
With exiles love to roam,
Without one dear familiar hearth
Which calls him back—his home?
The cost is you of pile or core.

Without one dear familiar hearth
Which calls him back—his home?
The cost is not of pile or cot,
What makes it dearly prized;
For 'tis content—not what is soent,
Not how 'tis shaped or sized,
But what can gold bestow on man
If not a piece of mind;
A home even on the installment pian
Where joy the heart can find.
What matters how if only now
This home is in your reach:
With small expense and common sense
Your choics to guide and teach.
McNichol's book is full of names
Of those who've pared the way;
And homelessness the father shames
Whe acts not now-to-day.
So simple this a child can't miss
The path to ease a nd peace.
Each has his bank, himself to shank
That debis no more increase.
By weekly saving, great or small,
The treasured home is gained.

ANAJOHARIE, N. Y. September 28.—Four killed and a dozen or startling news of the terrible railroad actral Railroad, two

miles east of Palatine Bridge Station, at midnight last night. The train to which the accident occurred was the St. Louis and Chicago express, bound west, sections generally run ten minutes sate. The sections generally run ten minutes apart, which latter order, from best information obtainable, seems to have been disregarded slightly last night. When the first section, Charles Averill, conductor, reached a point opposite Brandywine rift in the Mohawk River, Engineer William Weeks of Albany of the first section, noticed a sixing of Albany, of the first section, noticed a giving out of the steam cheer of his engine. He immediately stopped, and as seven passen-gers state, the bind brakeman of the first section ran back like a shot. As near as

They are now at the Hotel Wagner.

Among the passengers in the ill-fated car was Mrs. Tate of Frodonis, N. Y. She was on her way to Brooklyn. She was seriously but not fatally hurt. Also Harry H. Adams, County Treasurer of Brooklyn and his cashier, T. J. Farmley and a friend, Peter Snyder, also of that city. Their escape was marvelous, and they have only a few abrasions to show that they were in the wreck.

Judge Lamereaux, of Ballston, and Charles E. Gantz, of the Albany Evening Journal, were on the second section and were considerably shaken up. In the sleeper also were Miss McFadden, of Green Bay, Wis.; Geo. Gordon, of Chicago; Miss Higgins, of Cincinnati. The railroad presidents with their counsel, had been attending a monthly meeting of the offi-

INSPECTING THE RIVER.

Preparing Statements for the Consideration A large party went aboard the steamer Giling the river from the mouth of the Missouri to the Merameo. The inspection was made for the purpose of collecting facts and figures to be used before the Congressional Committee on Rivers and Harbors to urge a large appropriation for the Mississippi as St. Louis. The Congressemen for the Eighth, Ninth and Tenth Districts were on board. Maj. Murphy, Harbor and Wharf Commissioner, was there with maps, papers and figures, and acattered broadcast among the inspectors all the information he possessed. FIRST SPECIAL STAKES.

BAPHIC DESCRIPTION OF HOW KINGSTON WON THE BACK

HE greatest horse race of the year took place writes Black and Blue, describing the First Special Stakes. Excited thousands yelled with joy at the finish, cheered the victor, ap-plauded the defeated

brutes, threw up their hats in deference to the unparelleled time that had been made and altohoarse cheering was something that had not been heard on a race track since Proctor Knott's Futurity last year. Secretary McIn-tyre turned around at the judges' stand to face the shouting multitude after the race and moment that it was a great effort at self-refrom being executed by him there and then. has not been equaled in several years. There track was fast, the jockeys were the most skillful we know of, the horses were in the pink of condition, the race was truly run, the best horse won, losers applauded the victor, winners applauded the defeated horses and that so many circumstances are found in one successful combination upon the turf. It seems odd, perhaps, that Tenny, the incomparold, and Kingston, the yet unconquered 5-year-old, should have been racing all the season without having met until yesterday. been the cry of the Westerners all summer. "Wait until Kingston meets Tenny," has been the cry in the East. "Yes, and Raceland will beat both," said men who have won fame and fortune on the turf.

There was no unsatisfactory ending to the race. There was no doubt of superiority at the finish. Kingston, hard ridden, but not desperately ridden, won by a length from Raceland under a terrible drive and Tenny extended to his utmost powers. It was a race fast enough to break a horse's heart, and the that the last quarter of a mile was run in 244 were it not that every watch held by experts

The story of the race is soon told. Me-Laughlin, confident of the prowers of his horse and knowing his own skill, set out in ront, Isaac Murphy two lengths behind with Kingston, Los Angeles lapping and Tenny trailing right behind. The pace was fair for the first quarter. Then McLaughlin let out eys moved up, Kingston and Los Angeles with Tenny. The first quarter of a mile was run in 264s. McLaughlin made Raceland do the second in 25 seconds. The third was done in precisely the same time, Murphy, on Kingston, running up a trifle, instantly followed by Los Angeles and Tenny. Then McLaughlin, with rare good judgment, ceased to ride Raceland so hard in the fourth quarter, desiring to have also his reserve of speed in the fifth and final quarter of the great contest. The fourth quarter was run in 25%, the last half-furlong of it in very fast time.

run in 25%, the last half-furlong of it in very fast time.

McLaughlin, just as he was finishing the mile, looked behind only to see the black. Shining, confident face of Isaac Murphy right behind him on Kingston. Los Angeles was failing back and Tenny was coming forward under Hamilton's powerful persuasion. McLaughlin saw it was do or die. In went the spurs in Raceland's flanks, out jumped the mighty gelding in giant strides that carried him sweeping over the ground. McLaughlin was riding with all his tremendous skill and energy. But, fast as he went, Kingston fallowed with Isaac Murphy sitting confidently on the back of the turned into the stretch, Raceland leading by a length, with the post but an eighth of a mile away. Tenny was thundering a length behind Kingston, and Los Angeles was beaten off. As the equine champion got straightened out Kingston's head went up to Raceland's flank. Down came McLaughlin's whip with vicious intensity. In went his spurs in the extended thoroughbred, but all was in vain, for Kingston, with marvelous grace, headed the gelding, then got his head in front, then his body, and, amid the shouts of thousands and deeplie the efforts of McLaughlin, flashed past the post winner by a length. Tenny had come up the stretch like a whirlwind and was beaten only a head for

The Missouri Bicycle Club, under command of Capt. Hildebrand, will run to the far-off county line to-morrow, starting from their county line to-morrow, starting from their club-house at 8 a. m. sharp. The total distance for the round trip is sixty-eight miles and the attendance promises to be very large. Dinner will be taken at Baldwin on the return at 2p. m., and therefore an early start is imperative. The roads are reported to be in fine condition, particularly so west of Baldwin.

Capt. Sanders of the Cycling Club will tomorrow take his club over an entire new route to Lebanon, Ill. This will be the first club run ever taken to this piace, and it is expected that every member of the club will take part. The distance is twenty-four miles each way, and for the greater part the roads are said to be in good riding condition. Arrangements for a good dinner at the leading hotel of Lebanon have been made, and the party will h all probability be photographed after reaching their destination, so that every member who attends will retain a souvenir of the run. The start will be made from Nineteenth and Locust streets at 8 a. m. sharp.

Since then it has been painted white, the regulation navy color. The cruise of the Dolphin began two years ago this coming winter, the vessel at that time being attached to the North Atlantic Squadron. It was while she was in the West Indies that orders were suddenly furnished her to proceed round Cape Horn to San Francisco. To say that the Dolphin's officers were surprised puts it mildly. Down the east coast of South America the Dolphin's officers were surprised puts it mildly. Down the Straits of Magellan, up the west coast, running into Valparaiso, Caliac and Panama, and finally making her appearance at the Mare Island Navy Yard, San Francisco.

ON THE DOCKS.

There the vessel was docked, her bottom scraped, and a careful examination made for any show of weakness. About that time it was rumored that the six-inch breechloading rifles on the forecastic could not be fired without endangering the vessel's structure, and furthermore, it was said that the engines could not be run full speed because of excessive vibrations resulting. All of this is now emphatically de-

Aden was next visited, and after the passage of the Red Sea, Suez followed and the little croiser visited Port Said and Alexandria. The shores of Italy came in for a share of attention, and finally Gibraltar. On leaving Gibraltar the Dolphin headed to the northwest to join the Enterprise, and in company with her cruise in Irish waters.

The PRIDE OF THE NAYY.

The Dolphin joined the Enterprise at Plymouth, England, but the latter vessel received orders to proceed alone, while the Dolphin was instructed to be on the United States coast by October 1. Throughout her whole voyage the Dolphin proved herself a most seaworthy craft. Her machinery worked to perfection and, judging from the remarks of officers and men, all hands are proud of the "first vessel of the new navy." As soon as the Boston is out of dry dock the Dolphin will, hall likelihood, be put in but as yet nothing definite is known of the Department's intentions with regard to the vessel.

SHERMAN IDEAS.

Gen. SHERMAN'S proposition that the Constitution confers the right to vote on negroes is not at all in accordance with those decisions in which our Republican 2 00 Supreme Court has held so positively that the Constitution gives no such right, and that the elective franchise is the creature of State law. He has the Supreme Court on his side.

however, and is merely stating a wellknown provision of the Constitution when he says that any State in which the negroes are deprived of the right to vote should be deprived of representation in Congress for its colored population. But here again the Supreme Court in and says this provision reference to State acts in the shape of laws denying the right of suffrage to negroes, and has no reference whatever to the acts of lawless individual for which the State and community at large cannot be held responsible.

Still Gen. SHERMAN seems to be about as well posted as his brother, Senator entire control of the election of Congressmen and presidential electors in the hands of the Federal Government, and does not seem to know that an amendment of the Constitution would be required to make his scheme practicable. The Constitution as it now stands gives

each State Legislature exclusive authority over the manner of choosing the State's presidential electors and exclusive authority to prescribe the qualifications of determine whether its members of Congress shall be elected by the State at large or by districts. This authority would completely nullify the Federal control which Senator SHERMAN favors.

JEFFERSON BARRACKS' REAL EVILS.

The intimation coming from the Way Department, in connection with the appointment of a court of inquiry to inves tigate Jefferson Barracks, that the Barracks may be removed on account of the unhealthiness of the location, strikes anyone familiar with the place as an absurdity devised to deceive the court.

It is stated that the unhealthiness arises from the natural position and proximity to the river of the Barracks. And to this unhealthiness, it is suggested, is due the frequency of desertion by recruits. The truth is the Barracks are beautifully situated. The place was selected by Gen. R. E. LEE on account of its commanding position and the promise which the situation gave of exceptional healthfulness. The place has been noted in army circles as a delightful and healthful station. It is a new thing to claim that a great flowing river which may be utilized to sweep away all offal is a cause of illness. St. Louis is situated on the same river and the death rate of the city is the lowest in the country.

That the lack of proper sanitary improvements and the insufficiency and poor construction of the antiquated buildfall record a rapidly increasing death rate. ings cause unhealthiness may be true. But the river and locality are advantageous to health. The court of inquiry may properly look into sanitary conditions but the members should not allow the foolish suggestion mentioned to divert them from the main point of the investigation. Charges of bad and insufficient food, cruel abuse and improper medical THE recent slump in Sugar Trusts may attendance have been made against the and the desperate discontent which drives

recruits to suicide and desertion. The removal of these evils and of the the proceedings before Jefferson Barracks men who create them will obviate all are abandoned on account of the miscon- necessity of removing the Barracks from their present fine location.

An Associated Press dispatch from of the electric street railroad in that city admit that it is a failure, and that they will have to return to horse power. There The bad sanitary condition of Jefferson is no reason to doubt the ultimate success

Hearing that a number of druggists were selling drugs they called Bromidia when asked for it by their patrons, Battle & Co. investigated and arrested about twenty-five ruggists on a charge of infringing on the trade mark. The charge was made under the United States Statutes of 1870 passed by Congress. Several druggists entered a plea of guilty and on payment of a fine were discharged. About eighteen others employed John M & Holmes to defend them and fight the case against Augustave Koch, one of the druggists, ng the law or the penal part of it en-SHERMAN, who talks about putting the acted by Congress, was not valid or in force and that the defendants could not be punished under it for infringement. > "This is an indictment under the tradepark statutes of the United States," he says. "The history of the trade- mark legislation is this: In 1870 Congress passed a statute pro-viding for the registration of trademarks—a passed another statute imposing penalties for trespass upon rights obtained by the register-ing of trade-marks. Under those statutes

electors for members of Congress and to and on a certificate of division of power between the District and Circuit Judges cases came to the Supreme Court, and in what is United States, 82, of the the Supreme Court decided that the act of 1860 was beyond the power of Congress. It suggested in the pinion that under the commerce clause perhaps Congress had the power

country and foreign nations, between the States and with the Indian tribes. Immediately thereafter the act of 1881 was passed by Congress providing for the registering of trade-marks which might be used in foreign commerce and commerce with the Indian tribes. It did not re-enact the penal statute of 1876, and the act of 1881 contains no direct reference to that penal statute. Now the contention of the Government is that, although the act of 1870 had no existence—never had any—having been declared beyond the power of Congress, and that although, by reason of that fact, the penal statute of 1876 had nothing upon which it could operate, yet it stood as a valid enactment suspended in operation, when it was vivified and became an act imposing penalties for trespass upon rights given by the act of 1881. In the trade-mark cases, Mr. Justice Miller closed the opinion of the court with some reference to the penal statute of 1876, and his language is this: 'While we have in our references in this opinion to the trade-mark egislation of Congress had mainly in view the act of 1870, and the civil remedy which that act provides, it was because the criminal offenses described in the act of 1870 are, by their express scribed in the act of 1876 are, by their express terms, solely referable to frauds, counterfeits and unlawful use of trade-marks which were registered under the provisions of the former act. If that act is unconstitutional, so that the registration under it confers no lawful right, then the oriminal enactment intended to protect that right falls with it. Justice Miller's language is general, comprehensive, and if taken in its ordinary meaning and as respecting a matter then rightfully before, and rightfully passed upon by the Supreme Court, it is a decision of that court that the penal act of 1876 fell with the civil act of 1870. Court, it is a decision of that court that the penal act of 1876 feel with the civil act of 1870. But it is contended by counsel that the language does not require such interpretation. That all that was pending, and, therefore, all that was meant to be decided was that the penal act had then no force, nothing to act upon, because the civil act which it was passed to uphold has no existence. Assuming that that is true and that the question has NEYER BEEN CONSIDERED

and decided by the Supreme Court as now presented—for the act of 1881 had not been and decided by the Supreme Court as now presented—for the act of 1881 had not been passed—a question arises whether a penal statute can be upheld denouncing trespass upon a merely statutory right when there is in existence no such statutory right, and when whether there shall ever be depends upon the will of succeeding Congresses. It should not be doubted that, if an act were passed giving a statutory right and in the same act was a section imposing penalties for trespass thereupon, when the portion of the act giving the right, fell and the whole statute would fall.

When the act of 1881 was passed, if Congress "When the act of 1881 was passed, if Congress had intended that penalty should be imposed for a treepass upon the rights conterred by that statute, or if it had intended that the act of 1876 should be vivified and operate upon the act of 1881 it was very easy to say so. Its silence in this respect is cogent evidence that it did not understand or intend that the penal statute should be considered a part of present and valid law. And that assumption is strengthened by the fact that it had before it for consideration this passage from the Supreme Court, in which it broadly states that the act of 1876 had fallen with the act of 1870. Whatever may be true as to the full meaning Whatever may be true as to the full meaning

for consideration this passage from the Supreme Court, in which it broadly states that the set of 1876 had failen with the act of 1870. Whatever may be true as to the full meaning of that decision or as to the general power of Congress to impose penaities for trespasses upon rights having no existence it had before it the general affirmance by the court that the law of 1876 had failen and it must be assumed that if it meant that it should stand and be vivined or that any penaities should be imposed for violations of the law of 1881 it would have so stated. These considerations convince me very strongly that the act of 1876 has, as the Supreme Court said, failen with the act of 1870, and it is as much a dead letter as the act of 1870 and was not vivined or given operative force by the act of 1881. Of course in that view of the law the DEMURRER WILL BE SUSTAINED.

"I have not considered the other questions raised by the demurrer. Expressing my opinion upon this one must not be taken as implying any dissent from the views expressed by my brother Thayer, in the opinion heretofore filed by him. I have chosen to rest my opinion upon this question of the invalidity of the act of 1876 because if that be true there can be no remedy by changing the form of indictment. There being no final legislaffon by Congress, there can be no indictment found." The discovery is made in this decision that there is no law in the United States statutes under which civil suits can be brought and writs of injunction or judgment for damages secured. Should Battle & Co., or any of the hundreds of trade-mark owners who have a respasser arrested, or imprisenced or indicted. This will cause many trademark proprietors to awaken to the fact that they are not as thoroughly protected by the trade-mark not as thoroughly protected by the trade-mark as a they are statuted by the cane.

Is there not a city ordinance prohibiting driving steers during the day-time? If so, why is it not enforced? NATURAL GAS. Heavy Flow of the Fluid From a Well a Girard, Ill.

By Telegraph to the Post-Dispatch young farmer living two miles west of this gaged in sinking a well on his father's place. After going down to the depth of thirty-four feet, he came to solid rock, when he resorted to drilling with an auger. Proceeding about fourteen feet in the rock, he was astonished to legislate with reference to to hear a loud rumbling, and, on withdrawing trademarks used in commerce between this trademarks used in commerce between this country and foreign nations, between the States and with the Indian tribes. Immediately thereafter the act of 1881 was passed by Congress providing for the registering of trade-marks which might be used in foreign commerce and commerce with the Indian tribes. It did not re-enact the penal statute of 1876, and the act of 1881 contains no direct reference to that penal statute. Now the contention of the Government is that, although the act of 1870 had no existence—never had any—having been declared beyond the power of Congress, and that although, by reason of that fact, the penal statute of 1876 had nothing upon which it could operate yet it stood as a proportion of the country.

Yesterday, as published in the Post-Dis-PATCH, President D. R. Powell of the United Electric Light & Power Co. issued a circular John Nickerson, cashier of the St. Louis National Bank, and receive 50 per cent of the purchase price of their stock, on which Hollins & Co. held an option. They were to call to-day, Many of them did so this morning, but were somewhat surprised to learn that the money had not been deposited and the 50 per cent would not be paid to-day. Inquiry developed that Mr. Emerson McMillan, President of the Laclede Gas Co. and representative of the Hollins & Co. syndicate, is ill, and that was given as the reason for the failure to deposit the money. It was suggested, however, that it might be due to the light money market in New York. Those people have up \$50,000, which is forfeited unless they accept the option, and it is not likely they will do it. There was an idea that the failure to pay to-day would do that, but Messrs. Powell and Nickerson did not think any trouble would result. lins & Co. held an option. They were to call

As there would not be more than 250 or 300 ladles in attendance, the twenty-six persons assembled yesterday felt that they would be fully justified in guaranteeing a royal welcome to their distin-guished visitors, and with Miss Phobe Couzins n the chair, and Mrs. Maria Johnson secretary, the business of the meeting was quickly dispatched. Mrs. Samuel Highlyman was made chairman of the committee to was made chairman of the committee to draft an invitation to the congress convened at Denver, and Mrs. Highlyman and Mrs. Howe were appointed to attend the convention and deliver it. The history of the movement was explained at yesterday's meeting.

Mrs. Pauline Wright Davis, a leading suffragist, wife of Senator Davis of Rhode Island, who spent many winters at Washington with her husband, conceived the idea of organizing a Womans' National Congress, which should also meet at Washington each year, for the purpose of discussing all topics of paramount interest to women in their limited world, barring suffrage which was to be ruled out as a disturbing element. Uniortunately she died before her plans were fully matured, and the association was formed some sixteen years ago with Mrs. Charlotte Wilbur as the first president. Of course, the beginning was small, and the Congress now has but 550 women upon its roll, only three of whom are St. Louis ladies, Mrs. Rebecca N. Hazard, Mrs. Alida Howe and Miss Augusta Tovell. Mrs. Julia Ward Howe is the President of the Association, and upon their roll may be found quite a number of names of women distinguished in art, literature and science, who would attend the meeting of the Congress here, if the St. Louis ladies should be so fortunate as to secure it.

EDWIN ARNOLD, England's great will give his impressions of America in to morrow's SUNDAY POST-DISPATCH. THE STATE OF TRADE.

"Bradstreet's" Beview of the Week in Busi ness Circles.

NEW YORK, September 28.—The full volume of distribution in trade circles throughout the country, noted in telegrams to Bradstreet's last week, is continued and the chief stimulating causes, seasonably cooler weather, heavy cot-ton movement at the South and a uniform activity in metal industries remain as note-worthy features. Hog. products are firm and worthy features. Hog. products are firm and some kinds are higher on good demand and free dealings at the West.

Stock speculation tends to regain strength and activity in spite of unsettled rate problems in the West and a high and firm money market, though at close of week bear attacks unsettled the market. Bonds are dull and firm. Money at New York is in ample supply, but lenders are firm as to rates. Call loans, 6 per cent; foreign exchange is firm on the advance of the Bank of England rate to 6 per cent, but more liberal purchases of grain for export have a restraining influence on rates. Demand sterling, 4.884.

purchases of grain for expert uses and, during ing influence on rates. Demand sterling, 4.884.

There has been more interest and, during part of the week, excitement in wheat markets, extraordinary strength having appeared in the face of a heavy selling movement, with a net gain in price of about 18te New York and 28te at Chicago. Speculative sales increased heavily, those of cash wheat moderately only. Indian corn with nearly 300,000,000 bu estimated increase in the crop as compared with last year and free offerings, is off 4te and oats 12te. Exports of wheat (and flour as wheat) both coasts, aggregate 1.650,714 bu this week, against 2.008,677 bu last week, and 2.614,410 bu in the like week last year. The total exported from July 1 to date, a period covering one-quarter of current cereal year, is 24.214,715 bu, against 31,443,405 bu in three months of 1888 and 48,015,809 bu in 1887. Some 75,000 tons of rails have been purchased within six or eight days, besides which contracts for steel billets amounting to some 20,000 tons are reported. Prices asked for rails are 533 at Chicago, 351 at Pittsburg and 320 at Eastern mills. Within forty-eight hours inquiries for some 3,000 tons nave been received. A further advance is predicted by makers, because of the rapid increase in inquiries from Western and Southern companies aggregating over 100,000 tons. Numercous inquiries are on the market for Bessemer pig, charcoal iron and coke iron and prices very strong, but have not advanced excepting at Chicago and Louisville.

and more or less uncertainty exists as to size and quality.

Dry goods are more active at Boston, jobbers' sales having increased largely but less so at New York, where warm rainy weather, the advanced stage of the month and observance of Hebrew holidays have combined to reduce spot business materially. The trade as a whole is, however, in very good shape, the demand and movement being largely ahead of last year. Agents are more active in Bostob. Good orders for spring goods are reported at both markets. Prices are generally firm on light stocks, except for print cloths, which are weaker on light demand and increased stocks.

Actual requirements induce a fair amount of business.

The heavy cotton crop movement has induced a bearish feeling in spots at all leading markets. The decline varies from 1-6@4c at various domestic markets. September delivery was contered at New York, and fclosed the higher on short coverings.

Business failures reported to Bradstreet's number 180 in the United States this week, against 190 last week and 150 this week last year. Canada had 32 this week against 25 last week. The total of failures in the United States January 1 to date is 8,306 against 7,330 in 1888.

While Unies Sam's servants waited the chiefs sent to the commission by the messengers a bill of complaint and notice that they would meet the commission after they got their rice crop gathered. A reporter returned here yesterday from a trip of inspection to the reservation. It is reached by a very good wagon road, and farm after farm along nearly the whole way, until in the immediate vicinity of the reservation, attest the rich character of the soil. The Indians are a weak, wretched, nearly decimated people, numbering 1,200 to 1,500 souls, who were, at the time the white record begins, a mighty people of 80,000 to 100,000 warriors. The reseservation covers all told only six townships and about 70,000 acres, divided apparently equally between rich farming lands and magnificent pine timber.

The object of this meeting is not to raise funds, as this task has been entrusted to the local representatives of the different roads, but to ascertain the railroads reaching t. arrying capacity of the railroads reaching t. ouis, and the local street carlines. An estimate

will be made of the capacity of the latter, the city being divided into districts, north, south and west, and the number which can be carried in any direction will be ascertained as Battle Lake, Detroit Lake and all the summe closely as possible. A railroad manager today said that no estimate made at the present day said that no estimate made at the present time could be regarded as any guide, as every road could, if the necessity arose, increase its rolling stock several hundred per cent. All stand ready to extend their lines for any reasonable distance, and assert that there will be no difficulty whatever in handling any required number of passengers. Already in-quiries have been received as to the probable location of the exposition grounds from East-ern capitalists, and it is stated that ample

Washington, D. C., September 28,—When the question for a site for the World's Fair comes up in the House of Representatives one of the most prominent members to discuss it will be Representative McCreary of Rentucky, Chairman of the Committee on Foreign Affairs in the last Congress. McCreary in a talk with the Post-Dispatch representative would not express his preference as to the location of the Fair.

"There is one thing I will say, however,"

the Fair.

"There is one thing I will say, however," said Mr. McCreary, "this must be a permanent Exposition. It must not be a transitory thing—an unsubstantial display to be forgotten. It must be a monument. It must be continued as a museum dedicated to the arts and industries of the New World. This idea of permanency must control the selection of a site. The Exposition must be planted where it can stay and be properly maintained as a national institution for the rest of time."

The chorus is composed of sixty male voices, well chosen well drilled. Prof. Egmont Froelich is

nothing so sweet as the music of a chorus of male voices. It has an indescribable charm that the mixed voices do not possess. This evening the grand chorus will sing "The Dying Bugie," "I Think of Thee, Margaretha," and "On the Blue Danube," and Mr. Edward Dierkes, also of the Liederkranz, will sing "Nazareth," a Christmas hymn. Gilmore's programme for this afternoon was made up to please the children. President Kennard has set Saturdays aside as children's days, and to entertain the little ones

President Kennard was down yesterday for a little while, but he has not recovered yet from his attack of sickness.

The afternoon is the best time to hear Edison's Phonograph or talking machine, as in the evenings the crowds to hear it are simply jams.

Verestchagin's pictures have never been exhibited with greater success than in St. Louis. They are much admired here and the artist has made friends with St. Louisans through his work.

six arduous campaigns. It is time-stained and battle-scarred.

The Wrought Iron Range Co.'s display of Home Comfort hotel and family ranges is attracting more attention than usual and they are receiving so many orders that they will be obliged to build an addition to their already large factory.

Last night 1,054 of the Exposition visitors heard Edison's Phonograph or talking machine, and not an exception in that whole orowd that did not proclaim it absolutely the most wonderful invention of the age.

Mr. Fred H. Whipple, the manager of the electrical department, says he only had two months in which to get up the display. It is a marvelous exhibition, and considering the shortness of the time it is almost miraculous. He will have ten months on the next one, however, and it will surpass anything of the kind ever seen in this country.

main line; he has inspected the branches, and in a straight-forward statement he is represented as very strongly advising Baring Bros. & Co. against placing too much faith in any favorable stories which they may have hitherto heard. The tone of his report throughout is declared to be of a character likely to dissuade the great banking house employing him from putting more money into the property without a thorough overhauling and

him from putting more money into the property without a thorough overhauling and reorganization, and the insurance of more safety for further investments.

NOT WILLING TO TALK.

At the office of Kidder, Peabody & Co., the New York representatives of Baring Bros. & Co., it was admitted that a report upon the Atchison property had just been made by an expert engineer. That firm was not, however, willing to make public the text of the report now on its way to the London banking house, nor would an abstract of the report or even an indication of its tenor be given. There was no denial, however, of the current statement that the report makes a very unfavorable showing for the Atchison's property. People who profess to anow the report's purport declare that it is likely to receive great consideration from Baring Bros. & Co., inasmuch as it has been made under special directions from them by an engineer of their own selection and one whose standing here and abroad is very high. There is a belief that this report has been especially waited for by Baring Bros. & Co. before they would commit themselves one way or another to a plan for the reorganization of the company. Its influence is likely to be shown in that plan.

Non-Paying Lines Cannot Suspend.

Chicago, September 28.—A dispatch from Council Bluffs, Io., says: Yesterday Judge Love of the Federal Court rendered a decision which settles the right of rallroads to suspend operation of non-paying lines. Attorney Sheider of Chicago, for the the United States Trust Co., applied to the court for an order on the receiver of the Walsah system to have the road known as the Clarinda Branch, connecting Roseberry, Mo., and Charinda, Io., suspended on the ground that receipts of the branch were not sufficient to pay expenses. The order was refused, the court declaring that rallroads are governmental institutions, public conveyances and common carriers. The right to build a road through private property was granted on the representation that the road would furnish transportation for the public, Feople are dependent upon such reads for transportation. Corner of 9th & Olive streets. Set of teeth, 3 PRIVATE matters skillfully treated and medi-ines furnished. Dr. Dinsbeer, 816 Pine st.

Officer N. T. Williams of the Woman's Humans Society will this afternoon apply for a warrant before Assistant Prosecuting Attorney Dierkes charging Timothy Riordan, a foundryman, living at 1710 Austin street, with ernelty toward a 18-year-old child whom he claims as his daughter.

On Thursday morning the child came to Mr. Williams at his office, Sid Chestnut street, and complained of her parent's treatment, saying that she had run, away from her home in order to escape him. At that time her norse showed signs of recent abuse and Mr. Williams took the oase in hand. By inquiring among the neighbors he was told that the child's story was substantially true. Riordan, it was said, was unusually hottempered, and wreaks his vengeance on the child at the slightest provocation. She insists that the wound on her nose was caused by a kick which her father gave her after he had knocked her to what relation Riordan bears to the child. It is possible the story told by her is an exagger.

Smallpox at Lakeview.

Chicago, Ill., September 28.—An outbreak of smallpox which may prove serious was reported at the Lakeview heaith office last night. The patient is Jno. Weiter, aged 14, the son of wealthy parents. The Weiter family has just returned from Luxembourg, via Havre, where, on the 14th inst. small-pox being reported, young Weiter was vaccinated. The family salled on the Gasconde, landing in New York september 16. The next day they passed quarantine, started west on a Delaware & Lackwamns train and a breaking out was noticed on young Weiter's face. It was noticed to the city, a physician was called in who watched the case for a couple of days, and said it must be smallpox. Dr. Porter satisfied himself, and immediately began a course of vaccination throughout the neighborhood; all the school children in the vicinity are being vaccinated today. There is no doubt thousands of persons between New York and immediate the paper advanced a great many your stringly be no doubt. Among other things, Mr. St. John's direction. The Welter family has just returned from Luxembourg, via Havre, where, on the lath inst., small-pox being reported, young Welter was vaccinated. The family sailed on the Gasconde, landing in New York September 16. The next day they passed quarantine, started west on a Delaware & Lackawanna train and a breaking out was noticed on young Welter's face. It was thought then that it was a case of measies. The boy was taken to his home in the northern limits of the city, a physician was called in who watched the case for a couple of days, and said it must be smallpox. Dr. Porter satisfied himself, and immediately began a course of vaccination throughout the neighborhood; all the school children in the vicin ity are being vaccinated to-day. There is no doubt but thousands of persons between New York and Ohicago have contracted the disease. While it was tried to keep it quiet in Chicago, the New York officers were very careless to allow the case to escape their notice.

He wrote me the convention, but without saying what it was. As to the convention in general, I have said so much that I do not feel equal to saying anything more now without repeating what I have already said.

MR. WALKER HILL, one of the delegates, said the convention was an exceedingly large one, the delegates being in greater number than at any convention ver held before, though the Eastern mem-

opinion he is one of the coming financiers of the country. His paper was a great surprise. That a New York bank President should recommend that the Government be required to coin \$4,000,000 of silver a month instead of \$2,000,000 was altogether of the unexpected. His paper showed a great deal of thought. The question is one which Congress and the banks must face, and it was never more prominently brought out than by Mr. St. John. His argument had a great deal of force, and was fortified in every possible way. In his opinion the issue of gold and silver certificates had prevented it. As I said, Mr. St. John's paper was a suprise. He is certainly away ahead of his brother bankers in the East. It is difficult to tell, however, what the result will be.

A SENSATIONAL SPEECH. Dr. Holland's Remarks at Cleveland Yester

Rev. Dr. Holland, pastor of St. George's Episcopal Church in this city, created a sen sation in the meeting of the Brotherhood of St. Andrew at Cleveland, O., yesterday. In New York asked the convention what was He said that he thought the term workingman was often misapplied. A lively discussion to lowed, and some strong ideas in regard to what is generally called the labor question were advanced.

Dr. Holland's speech was rather startling in its nature. He is conted in the telegraph this

is generally called the labor question were advanced.

Dr. Holland's speech was rather startling in its nature. He is quoted in the telegraph this morning as saying: "All men are not equal; we are not born equal and we never can be equal. The idea that 600 created men equal grew out of the superstition and the ignorance of an age that has passed away. It is 60d's law that some men shall be greater than others and all the anarchy and communism and the atheism of the world can not change it. Here in this country we are ruled by a government that upholds this doctrine of equality and our politicians sand rulers are atraid to speak the truth because the lower order of society has a vote. I pray heaven that the clergymen may not also be ruled by this fear of votes."

Dr. Holland's remarks created quite a sensation. The sensation did not subside in the hall where the Brotherhood of St. Andrew meeting was in progress, either. It has extended all the way from Cleveland to St. Louis. The Episcopalians, and in fact all religionists in St. Louis who read the remarks of the pastor of St. George's, were some what astounded at them, and there was agreat deal of discussion to-day on the matter. Some Episcopalians had an idea that some where in their ritual there was a prayer which began. "O Lord Who Made All Men Equal" but on looking it up it was ascertained that the was no prayer beginning with that sentiment, and Dr. Schuyfer said that he did not think there was anything in the ritual which might be construed as a recognition of such a doctrine. Dr. Holland's boild annunciation of his belief is, therefore, not in conflict with any collect of his church. There was also a great deal of discussion locally on the approval; by the Brotherhood, of Guy A. Hogg's denunciation of card parties, dances and theaters. There is a liberal element in the Episcopal Church which does not approve of condemning people for attending theaters, playing cards or indulging in dancing, and they lament any tendency towards such illiberality as they b
